PROFILE SUMMARY

From leading a small unit in counter narcotic operations to flying helicopters. With a commitment to tackle new challenges, I've extended my expertise to modern web development, utilizing technologies to create clean projects and code. I'm dedicated to accelerating project success, analyzing complex issues, and Fullstack software engineering solutions that make a difference.

TECHNICAL SKILLS

JavaScript	Bootstrap	Python	MySQL	Git/GitHub
ReactJS	HTML & CSS	Node.js	Linux/UNIX	JSON
jQuery	Docker	MongoDB	RESTful API	OOP

PROJECTS

Holberton Hacksprint – Wes's Cozy Kitchen

GitHub Repo – https://github.com/Nomad-Rob/Hack_Sprint-Breakfast

- Developed a Python program utilizing Pygame library during a Hacksprint
- Primary role during project was Database and Game Logic

Technologies utilized – Python, Pygame, and JSON

Job Application Tracker

GitHub Repo – https://github.com/Nomad-Rob/job_tracker

- Created a job tracker program that allows user to manage (CRUD) data from a database
- Created an intuitive search and filter system, enabling users to quickly locate specific job applications

Technologies utilized – JavaScript, MySQL, Docker, OOP, Python, HTML & CSS

AirBnB Clone

GitHub Repo – https://github.com/Nomad-Rob/holbertonschool-AirBnB_clone_v4

- Developed a fully functional Airbnb clone web application from scratch, showcasing proficiency in full-stack web development
- Implemented user authentication, property listing, and booking functionalities, creating an interactive and user-friendly platform

Technologies utilized – Python, MySQL, jQuery, Flask, JavaScript, JSON, HTML & CSS
